AERMEC

DI24

The New Recessed Interface (503 box) with 2.4" touch screen display to be combined with VMF-E19, VMF-E19I accessories. It allows you to regulate and monitor the temperature inside rooms precisely and on time; in addition to accessing and interacting with your system's operating information, parameters and alarms, it allows you to set time periods. It is supplied with a graphite grey plate; however, to allow the interface to be customised so that it fits in perfectly with the style of any home, DI24 is compatible with plates of the major brands available on the market.
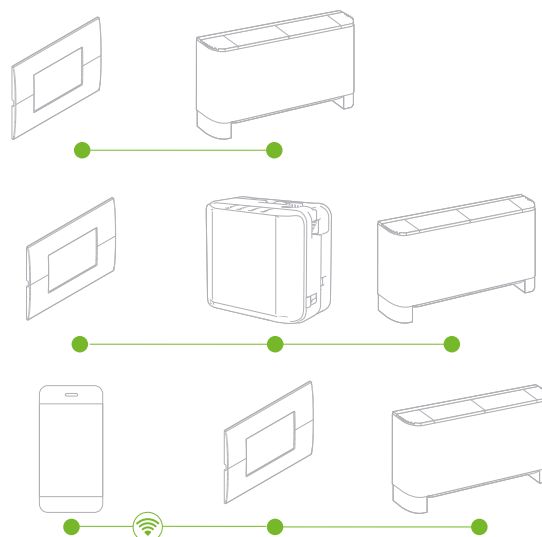

Features

Graphite black colour
5 Vdc power supply
Display: TFT 2.4'', 256 colours
Touch screen: 320x240 pixels resistive

New AerSuite APP

You may download the AerSuite app available for iOS and Android operating systems. This is an app for Smartphones and Tablets with which the user will be able to remotely access the functioning information of their system, view the system's parameters and alarms, and set the main functioning parameters. AerSuite will allow each AER503/DI24 to manage a single device up to a maximum of 20 nodes distributed over a maximum of 20 installations.
